

THROUGH THE YEARS

Ambassadors members effect on the time they spent in Carmel's top competition choir

FIRST YEAR
SOFI RIVERA, 12

SECOND YEAR
AIDAN MELLOR, 12

WHAT WAS YOUR FIRST YEAR IN AMBASSADORS LIKE?

"My first year in ambassadors has been so much fun. Its been great to be in a mixed group again since I haven't done that since sophomore year. It's been awesome to work with mr. Barker, he's just such a wonderful director."

"My first year in ambassadors was eye-opening, to say the least. Knowing the full extent of what goes into every part of the process was fulfilling and stressful at times. It was definitely a growing experience."

WHAT HAS MADE THIS YEAR DIFFERENT?

"Ambassadors is a very different enviornment. Unlike Accents, it was a mixed group. We have so much fun and we are so energentic on and off stage. Rehearsals are crazy and a ton of fun."

"This year I feel is more impactful as a message and for us as Ambassadors. I think the show is far more unique than anything the Ambassadors have put on before and I think will make the set truly amazing."

WHAT ADVICE WOULD YOU GIVE SOMEONE WANTING TO BE A PART OF AMBASSADORS?

"If you love to sing, dance, and perform then go for it. Talk to the directors and get involved. However, if you want to be a part of Ambassadors make sure you have other experiences in Carmel Choirs so you know the directors and what's going on."

"Take it all in, enjoy every bit of every rehearsal and every performance that you can. Remember that the trials and frustration you will have to face in and out of rehearsal will not matter by the end of the year and you will surpass all obstacles along the way."

WOMEN IN STEM

senior Zoe Komiaris talks about feminist STEM movements

"I joined Code for Change because I think its important for more kids to be involved in coding. It is such a marketable skill throught life even if you dont go into proگرامing. I am ging to be an aerospace engeeneering major in college, and for any good engeneering major you should have a proگرامing back-ground.It makes me kind of sad that there arent to many girls in Code for Change."

"The number of girls decreases every year, but the girls who do make it and are part of the pro-gram really inspire me and make me want to aspire for more. I also love to motivate other women to join the coding movement. I hope that other small girls that watch other grls like me coding inspire them to follow the coding move-ment, and keep the movement going in the future,"
