

FUTURE FADS

I guess that self driving cars are going to be a lot more popular than they already are. Brands such as Tesla and Range Rover already have this feature in their cars, so it wouldn't surprise me if more brands continued to add this feature in their vehicles.

-ASHLYN BAUDIER, 11

The trend now is old stuff. So maybe bikes with big front tires or giant cameras and polaroids. I think vintage things will be a big trend in the future because some things are already a trend now, so maybe other things in that category will become more popular.

-SETH JACOBSEN, 9

I think that track suits are going to be and upcoming trend. We've been going back in time and going back to past trends and they were big in the early 2000s. So I think those will make a comeback.

-BELLA GILLIAM, 10

I think that people won't bring backpacks to school because everything will be online, including class work, textbooks, and notes.

-ALAINA O'REAR, 11

I think that everyone is going to wear big oversized sweaters in the upcoming decade. Since it is a trend now, I feel like it could be a more popular trend in the future. I don't see why it wouldn't be a trend later.

-BRYSON TEA, 9

I think a lot of things related to space will be a trend. If we launch a new satellite, or something like that, that'll become popular and be a big deal.

-RILEY CHOE, 10

I definitely think that bell bottoms and animal skin clothes will come back this decade. They are just so trendy and I can already see so many celebrities wearing them right now.

-ALEX GRIEF, 12

I think a future trend in this next decade will be that cars will be all electric. It is really good for the environment and saves fossil fuels. They can also go really fast.
